

Symantec Software Scholarship

Encouraging Utah Students to Pursue Innovation through Math, Science, and Software Careers

Win a \$10,000 College Fund Scholarship

What is it?

The Symantec Software Scholarship program is intended to encourage high school students to pursue education in math and science. You could win one of four \$10,000 Symantec Software Scholarship Awards* when you create and enter a science project that involves computer software into a Utah regional science fair.

One scholarship will be awarded at each of the four science fairs. Scholarships will be given to students who best meet the criteria outlined in Symantec Software Scholarship Rules and Regulations. A team of Symantec software engineers will serve as a panel of judges, and will be responsible for choosing the winning participants.

How to participate

To participate in the Symantec Software Scholarship program, you must:

1. Carefully review Symantec Software Scholarship Rules and Regulations so that you can be certain that your project idea meets the Symantec Software Scholarship requirements.
2. Be selected to compete in a Utah regional science fair by qualifying in both your school and district science fairs.
Note: You do not have to win at the regional science fair level, but you must compete at this level to be chosen for a Symantec Software Scholarship.
3. Go to www.symantec.com/about/profile/responsibility/software_scholarship.jsp and register as a Symantec Software Scholarship participant. (Do this at the same time you enter the regional science fair.)

To learn more, visit www.symantec.com/about/profile/responsibility/software_scholarship.jsp

You can also send your questions or comments to symantec_scholarship@symantec.com. You may also use this email address to request additional help from a Symantec software engineer or manager.

*The Symantec Software Scholarship award money is held in a trust fund by the Utah regional science fair. The funds can be accessed by the recipients of the scholarship on a reimbursement basis for verifiable college or university related expenses at any accredited college or university in the state of Utah. If a group project is chosen for the scholarship, the award will be divided equally between the participants in the group. Symantec reserves the right to withhold scholarships in the event that there are no qualifying projects. Other conditions and restrictions may apply.
